

Table 2.3: This sideways table is constructed using the `\tabular` environment. This would only be necessary for tables so wide that they don't fit the normal width, but not so wide that they would also exceed 8.75", the usable height of a thesis page, using the usual L<sup>A</sup>T<sub>E</sub>X font in the table. Notice that this table uses the same font style and size as in the body of the thesis. The caption appears **above** the table (nearest the left edge of the page) as it should in a C.U. thesis.

n	$n^2$	$n^3$	$n^4$	$n^7$	$n^{13}$
2	4	8	16	128	8192
3	9	27	81	2187	1594323
4	16	64	256	16384	67108864
5	25	125	625	78125	1220703125
6	36	216	1296	279936	13060694016
7	49	343	2401	823543	96889010407
100	10000	1000000	100000000	1000000000000000	1000000000000000000000000
1000	1002001	1003003001	1004006004001	1007021035035021007001	1013078286716288717717287715286078013001
